WEEK 03 ASSIGNMENT

Course Title: Software Development III: AI-Based Software Project Development

Course Code: CSE 4104

Section: 7D | Spring 2026

Submitted to

Md. Riaz Mahmud

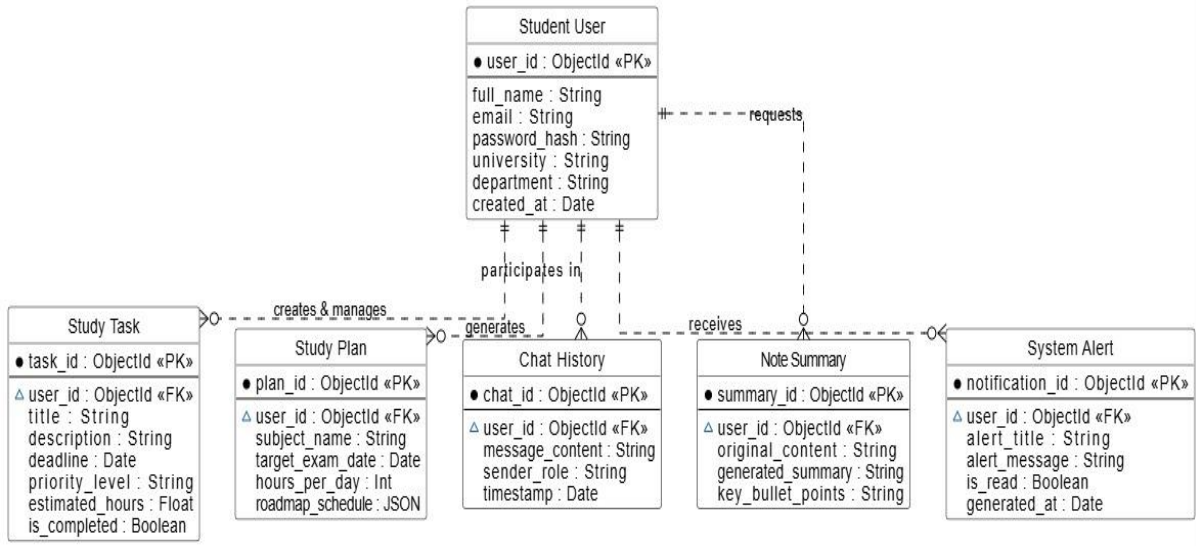

Assistant Professor

Department of Computer Science and Engineering

Northern University of Business and Technology, Khulna

Khulna 9100, Bangladesh

ER Diagram (Entity Relationship Diagram)

Theoretical Description

The Entity Relationship (ER) Diagram models the logical database schema of the OrbitMind AI platform, designed for our MongoDB backend. It defines the core data entities (Student User, Study Task, Study Plan, Chat History, Note Summary, and System Alert) and maps their structural relationships. Primary Keys (<<PK>>) uniquely identify each record, while Foreign Keys (<<FK>>) map the one-to-many cardinality relationships. This clearly illustrates how a single student generates and owns multiple tasks, study plans, and chat logs, ensuring strict data isolation and integrity across the application.
