WEEK 03 ASSIGNMENT

Course Title: Software Development III: AI-Based Software Project Development

Course Code: CSE 4104

Section: 7D | Spring 2026

Submitted to

Md. Riaz Mahmud

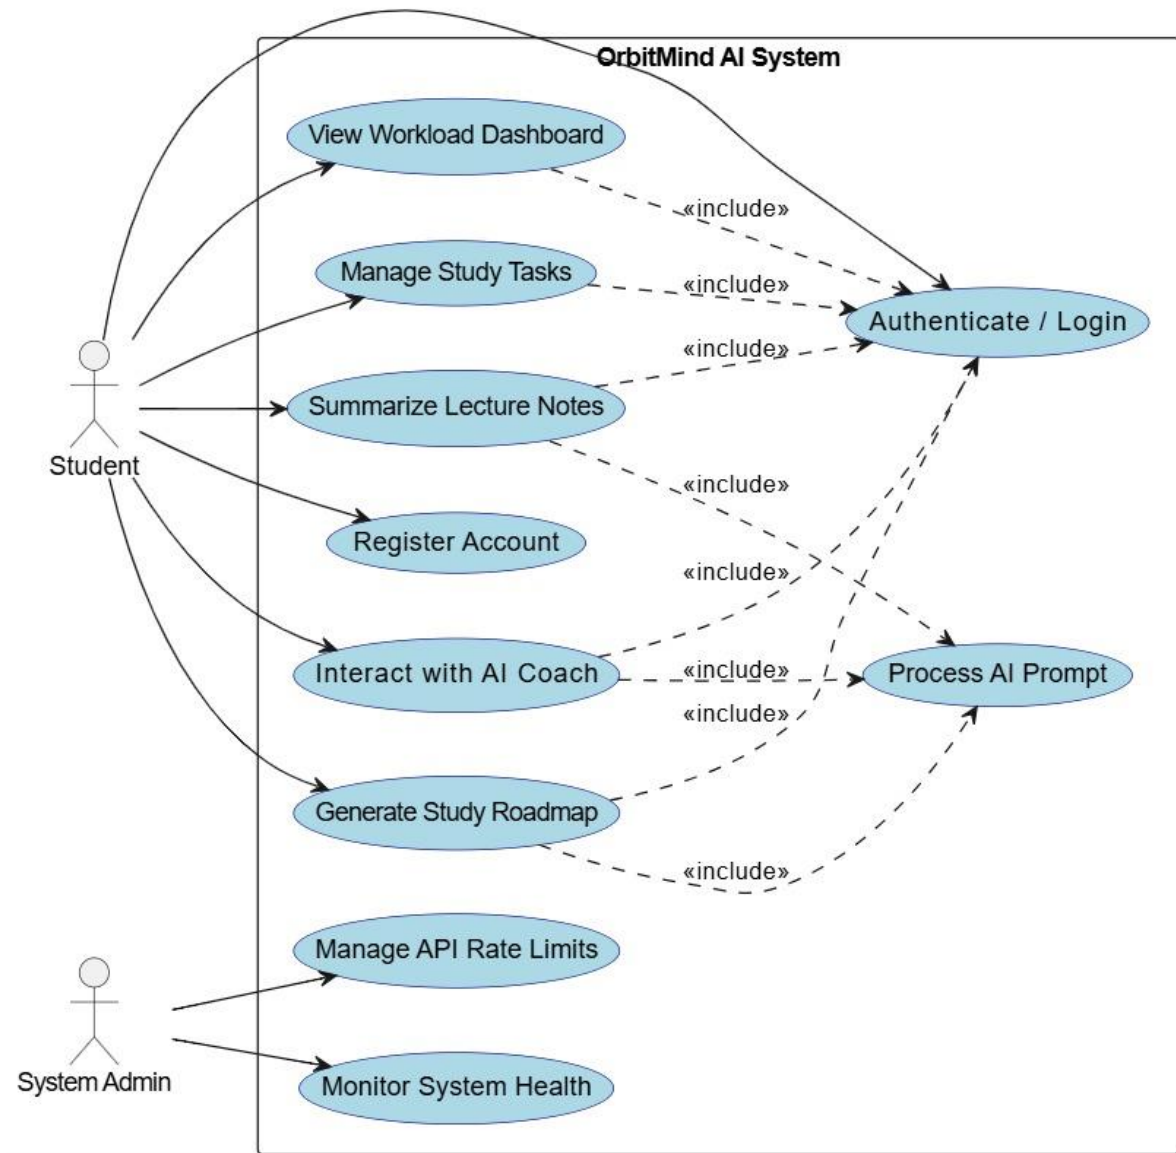

Assistant Professor

Department of Computer Science and Engineering

Northern University of Business and Technology, Khulna

Khulna 9100, Bangladesh

Use Case Diagram

Theoretical Description

The Use Case Diagram illustrates the functional scope of the OrbitMind AI system by mapping the interactions between the primary actors (Students and System Administrators) and the core system functionalities. It highlights how the Student actor engages with the system to manage tasks, generate study roadmaps, and interact with the AI coach. The <<include>> relationships demonstrate critical system dependencies, explicitly showing that authentication is a mandatory prerequisite for all primary actions, and that the AI processing module is securely invoked whenever the study planner, summarizer, or AI coach is utilized.
